**YOUR 48-PAGE GUIDE TO INFLIGHT MOVIES, TV, MUSIC AND GAMES**

## AUDIO

### Jessie J

Undoubtedly the emergent female pop talent of 2011, Jessie J is no longer the music industry's best-kept secret. Although this year's *Who You Are* is her debut album, she had previously worked behind the scenes writing songs for the likes of Chris Brown, Alicia Keys and Miles Cyrus – most notably penning the latter's *Party In The USA*. Now her sassy but soulful tunes have been recognised in their own right. *Who You Are* spawned three smash-hit singles, including *Price Tag*, her collaboration with US rapper B.o.B, which streaked up singles charts around the world.

## TV

### WorldRiderZ

Showing on board this month, *WorldRiderZ* is more than your average travel show. Adventurous duo Stephane and Paul ride their motorbikes around the world for a good cause - showing different countries' healthcare professionals the latest technology in fighting kidney disease. The charitable pair's journey from Sydney to Paris is part of the WorldRiderZ team's project to build an internet-based information-sharing platform connecting doctors and medical staff in major hospitals with remote areas of the developing world and impoverished regions. Malaysia Airlines is proud to be an official partner of WorldRiderZ.
